Acceptable Use of Technology Policy

Sample document for demonstration only

Digital tools help children learn, and this policy explains how they are used safely in school. It covers school computers and tablets, the school internet connection, and online communication.

Pupils may only use devices under the direction of a teacher. Internet access is filtered and supervised. Pupils must not share personal information online, and must tell a teacher if they see anything that upsets them.

Mobile phones and smart watches that connect to the internet are not allowed in school. A child who brings one must hand it in to the teacher at the start of the day.
